

WATERTRONICS®

WATERVISION® 2.0

Staying connected and in control of your Watertronics pump system just got better with WaterVision 2.0. This next generation of advanced cloud telemetry now gives users equal control on any mobile or desktop device.

NEW ADVANCED FEATURES INCLUDE:

- 1 Equal system control and monitoring on any remote device
- 2 Expanded reset menu of safeties and alarms—individual pump disable, time of use lock out
- 3 Store and forward—if connectivity is lost, program stores activity, then forwards when it's restored
- 4 Improved diagnostic charts, specific system alarm detail, VFD fault details
- 5 Improved report generation
- 6 Filtration and chemigation overview
- 7 Water management enhancements—limitation of daily and/or monthly pumped water
- 8 Advanced station to station communication using rules-based logic
- 9 Reworked dashboard to show the most important station equipment status in one spot
- 10 Secure multi-user access levels

For more information visit watertronics.com or call Pump Service Network at 1-262-367-1000.
